SPICE ISLANDS & RAJA AMPAT

Combining the small chain of the Spice Islands scattered in the Banda Sea with the tropical paradise of Raja Ampat is sure to deliver an adventure to remember, covering historical sites, spectacular reefs and pristine beaches..

For many years, the Spice Islands (also known as the Banda Islands) were renowned for their significance in the spice trade. Today, they are known not only for their history but also for their breath-taking landscapes. With a mixture of history and natural beauty, abandoned forts, nutmeg groves and markets, this region has plenty to see on land.

Raja Ampat comprises a total territory of 9.8 million acres over land and sea, and beneath the surface, it is recognised as the world's most bio-diverse marine ecosystem with over 1,200 species of fish, 550 species of coral, and six of the world's seven species of turtle. Intrepid visitors can trek through the jungle to seek out endemic birdlife, visit remote villages, explore sea turtle rookeries and pearl farms or discover mangroves by sea kayak.
